GAM Access Pro Memory Console with Cue Card excellent \$650

The GAM "Access Pro" is a 96 channel DMX memory console capable of being softpatched to 256 dimmers. It has 24 X 4 pages of manual submasters, (96 total) with six character submaster labeling, a grandmaster, an X/Y timed crossfader and 232 cue storage via internal memory (10 year retention) or memory card (Cue Card). There are four operating modes: Live, Blind, Submaster, and Patch. There is a numeric keypad, raise and lower keys, and six function keys for selecting the various operating modes. Functions include insert cues, up, down, delay, and wait times which can be used to create loop sequences. The unit is extremely compact and lightweight, measuring 19"w x 10" d x 3.5" high and weighting only 7 pounds. It has a standard 5-pin DMX output. Supplied with separate 12" 9-pin TTL monochrome video monitor, Cue Card, and instruction manual. In excellent condition with 12 month warranty.
