GAM Access Memory Console

very good

with Cue Card \$525

without Cue Card \$425

The GAM "Access" is a 48 channel DMX memory console capable of being softpatched to 256 dimmers. It has six manual submasters, a grandmaster, one A/B manual crossfader, an X/Y timed crossfader and 232 cue storage via internal memory or memory card (Cue Card). There are four operating modes: Live, Blind, Submaster, and Patch. There is a numeric keypad, raise and lower keys, and six function keys for selecting the various operating modes. Functions include insert cues, up, down, delay, and wait times which can be used to create loop sequences. The unit is extremely compact and lightweight, measuring 19"w x 10" d x 3.5" high and weighting only 7 pounds. It has a standard 5-pin DMX output. Supplied with separate 12" 9-pin TTL monochrome video monitor and instruction manual. There are two units available, both in very good condition with 12 month warranty.
