**ETC Vision 100 channel DMX Memory Console** very good 1 @ \$795 & 1 @ \$895

192 dimmer proportional softpatch, 200 cues per show with up to 5 shows recordable on the 3.5" floppy disk storage. Two timed faders with GO/HOLD/BACK/CLEAR buttons. Four selectable display modes: Stage, Blind, Setup, & Patch. Many other features such as insert cues, delay times, and HELP key for description of each function. Printer port. Standard 5-pin DMX output. Monochrome video monitor and full instruction manual included. One unit has 32 channels of 0-10 analog output and the other has 64 channels of 0-10 analog input for recording cues from a manual console. ETC is today's leader in memory consoles, dimmers, and lighting instruments and still offers limited support. These 1985 consoles led the way in terms of features and pure ease of use. Still one of the most user-friendly memory consoles available anywhere. \$2500 price tag when new! 6 month warranty.
