Pancan "Pancan" Moving Mirror

Attachment very good **\$225**

This is the original moving mirror unit! Uses three channels of your existing analog 0-10volt console to pan, tilt, and also change to one of three gel colors! No separate power supply needed--plug into 120vac, use included adapters to slide into 6" or 8" gel slot, and run control cable to your console. You now have a way to move a beam of light anywhere on stage and change its color!30-day warranty (refund)if it stops working. No repair possible as the manufacturer is no longer in business. Works very well.
