

dmx8 Interface for Microstar Memory Control

Specifications:

Function: converts second 8 channels of a Microstar card analog 0-10 vdc to DMX; compliant with USITT DMX 512 1190 protocol

Size: 1.50" H X 3.00" L (mounts in Ile AUX slot)

Board connectors: micro screw terminals for analog input and DMX output

Microstar interface: DB 25 male/female connector
(plugs into Microstar rear panel DB 25 connector)

DMX output: standard 5-pin female XLR on pigtail cable

Power: 12 vdc from Ile internal video connector

Analog input: absolute maximum 10 vdc
(over 10 vdc will set DMX outputs to zero)

Indicators: Red LED for 12 vdc power
Green LED for .25 vdc or greater analog input

Warranty: one year parts, labor, and return shipping

Price: \$195 including installation/operation manual

Custom versions available with more channels or adding DMX output to existing analog controllers, etc.
